BLACKBURN WOOD FIREBOX

BLACKBURN WOOD FIREBOX

Blackburn wood burning fireboxes are meticulously crafted to provide an unparalleled visual display of the fire, bringing warmth and ambiance to any space. Available in 36", 44", and 54" sizes, the smooth surface and clean lines create a minimalist aesthetic that effortlessly blends with a wide range of interior styles.

For a refined, timeless aesthetic, our fireboxes offer classic brick or herringbone refractory liners in curated colors: natural concrete, white, mocha, and black. These liners bring depth and character, echoing the craftsmanship of traditional masonry fireplaces. For a more contemporary expression, a smooth-surface refractory option provides a clean, understated backdrop that complements modern interiors.

BLACKBURN ACCESSORIES

LINERS

Liners improve heat reflection and efficiency while protecting the firebox walls, helping your fireplace operate more effectively and last longer.

BI-FOLD DOORS

Bi-fold fireplace doors provide a convenient way to control airflow and contain sparks while adding a polished look and making it easy to open the fireplace fully when enjoying the fire.

LOG SET PAIRING

Empire Hearth Vented Log Sets are the perfect complement to the Blackburn Firebox Series, delivering efficient warmth and timeless style. For full details, features, and specifications, please refer to the Empire Hearth Blackburn brochure.

SAND PAN

SAND PAN VENTED BURNERS

Sand Pan burners deliver the rich, natural ambiance of a real wood fire — without the hassle of hauling logs or maintaining the flame. A single-burner system uses one burner to produce a single flame pattern beneath the logs, offering a simple and cost-effective fire presentation. A double-burner system uses two burners—typically one in the rear for taller flames and one in the front for glowing embers—creating greater depth and a more realistic wood-fire appearance.

ELITE RADIANT

ELITE RADIANT VENTED BURNERS

The Elite Radiant burners' unique construction and integrated radiant fiber heat sink produce dancing flames without the mess of sand or vermiculite.

Feel more heat radiate back into your room, use less fuel than a standard vented burner, with less hassle than a wood-burning unit.
